Save Doraemon

Hun Rim, Nicola Fontana Giorgio Bonetto, George Batyrev

The user guide step by step

1. First you have to <u>install</u> DrRacket.

2. Open the '.rkt' file called save-doraemon.rkt and press the "RUN" button on the top right corner of the application.

3. Type in the interaction area "(main case-1)" to open the game's Graphical User Interface.

4. To start the game and move over from the starting screen press the "ENTER" (/r) key.

5. The premise of the game is to move through the gaps between the pillars which spawn at random height and obtain as much score as possible with your character (DORAEMON).

6. You can press the "SPACE" or the "UP" key to jump with your DORAEMON and ultimately avoid the obstacles.

7.You can try your luck eating the dorayaki sweets;

When you eat a dorayaki (ITEM) it will randomly adjust the gap of the pillar between either 270 pixels or 170 pixels until you crash every 5 seconds.

8. When you crash it will lead to the Game-over screen.

9. If you press the "RETURN" button on the screen, it will lead you back to the starting screen and you can play again.

10. You can quit the game anytime by pressing the "Q" key.

11. Good luck and Have fun!
